

Browser- opens the doors to the internet (allows you access)

Search Engine – the tool/vehicle you use to surf/explore and find your information

Data Base – place where information is stored (may contain websites, webpages, videos, images)

Website- also contains information, usually topic specific, has more than one layer/page

Webpage – One page of information, usually topic specific

Link – takes you to another location in the internet (very quickly, eliminates all the other steps)

URL – the address where you find your data
website/page/picture/image/video

Everything on the internet has an address (a specific location where it can be found)
